APRIL 19-21, 2017

MANDALAY BAY LAS VEGAS, NV

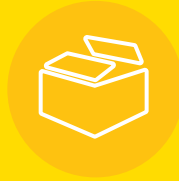

APPLICATIONS | INNOVATIONS | OPPORTUNITY | SALES

CPP EXPO

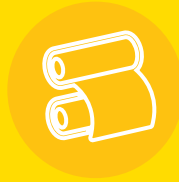

As an equipment provider there is no better place to be than in front of key influencers and decision makers in packaging materials production. There is really nothing puzzling about it: the branding opportunity that resides in packaging and display materials is unmatched. These items speak to the consumer directly and relay a message that transcends, yet supports campaigns on all levels and in all geographies. The co-location of CPP with ISA addresses the need to reach brands as they conceptualize campaigns while supplying the tools and applications that make these campaigns a reality.

PACKAGE PRINTERS/CONVERTERS

Looking for the very latest innovations and applications - especially in digital, hybrid and wide format.

DISPLAY/SIGN/COMMERCIAL PRINTERS

Looking to expand their "footprint" in package printing and already "fluent" in many digital solutions available

BRAND AMBASSADORS

Brand managers, packaging designers, purchasing agents, as well as innovations teams spearheading implementation, activation and integration of all elements in consumer messaging.

INNOVATION & EDUCATION DEFINE CPP EXPO

Join leading equipment providers from around the world who will demonstrate package printing, converting and finishing solutions that make unique, customized packaging a reality. Confirmed support by traditional and new partners, such as Package Design Magazine, Mintel, Graphic Communication Institute at Cal Poly, PIA West Coast Affiliates ensures educational programming that will attract participation by all involved - or who want to be involved - in packaging production. Tracks crafted for each stakeholder will be highlighted with specific information on business development strategies. Take a look:

- CalPoly primary market research: Emerging Technologies for Packaging Innovation
- Digital/flexo print process positioning
- Marketing - how CPG brand owners view packaging as an element of the marketing mix
- Print process financial modeling (traditional vs. digital, hybrid, inkjet)
- Integrating digital printing into converting operations (flexo, offset, digital Ink Jet, digital electrophotography)
- Interactive Packaging (QR Codes, Printed Electronics, Security/RFID, Augmented Reality, Near Field Communication, etc.)
- Case Studies for wide web applications: labels, flexible packaging, and more
- Digital printing for packaging - where is it today, and what to watch out for

PRINT MEDIA CENTR PRESENTS THE PACKAGEVERSE

Right on the show floor in Booth No. 339 will be the HUB of activity featuring Hot Trending Panel Presentations focusing on APPLICATIONS that are driving innovations across all printing processes. For the packaging industry, this is the launch of the ultimate in social media - face-to-face!

Powered by PrintMediaCentr, the Packageverse at CPP EXPO is an open space for attendees to meet, tweet, and learn! Join the conversation today @PrintMediaCentr and #Packageverse.
