

CPP EXPO

Collaboration in Packaging Production

General Information:

The must-attend event for the all seeking innovation in packaging, CPP EXPO will be **the** collaborative forum that features and highlights business development opportunities for all key stakeholders in this community. Discover amazing diverse packaging applications, how to produce them - ready for shelf and sale!

CPP EXPO is now heading into its twelfth edition and remains the only event dedicated exclusively to packaging production equipment, machinery and materials. The 2017 adds a twist to the traditional concept with the ability to attract an expanded audience of brand ambassadors, including brand managers, packaging designers, display/POP designers, purchasing agents – and all involved in branding packaging and placement!

This adaption comes from our co-location and partnership with ISA International Sign Expo in 2017. ISA is the epicenter of sign and display will add another dimension of printing processes and applications that are in demand in packaging production – including, inkjet, digital, flexo, hybrid – and wide format applications that are now exploding into labeling/packaging processes.

Who Exhibits:

Exhibitors are the suppliers of the most innovative equipment, materials, supplies and substartes available to the package printing and converting industries. And, for the first time at CPP EXPO will also play host to INKJET, DIGITAL & HYBRID SOLUTIONS due to its co-location with ISA.

Who Attends:

CPP EXPO ... the show of choice for those involved in packaging production & converting...

CPP EXPO 2017 Co-located with:

Imagine a forum that allows designers, buyers, sellers and manufacturers to share their collective knowledge and insight. This is a must attend for anyone involved in packaging at any level."

**Paul Wartman,
Senior Vice President –
Primary Color**

"The co-location between ISA and CPP is a perfect opportunity in the digital print eco-system to bridge signage and packaging all in a single event. We look forward to exploring the synergies and business expansion opportunities by learning more about these closely related industries."

**Brandon Hensley,
Chief Operating Officer –
ISA**
